

Saher Saadi

Full-Stack Software Engineer | AI & Automation | React | Node.js | Python | Docker | AWS

+972 50 436 8748 | saher.saadi.99@gmail.com | Israel | saher-portfolio.netlify.app | github.com/Saher-15 | LinkedIn

SUMMARY

Full-Stack Software Engineer with B.Sc. (2023) and M.Sc. (2025) in Software Engineering. Experienced in building production-ready web apps, REST APIs, RAG systems, and automation pipelines using React, Node.js, Python, FastAPI, Docker, and AWS. Skilled in AI integrations with Claude and OpenAI APIs. Trilingual: Arabic, Hebrew, English.

EDUCATION

M.Sc. in Software Engineering — Ort Braude College of Engineering 2023 - 2025

Machine Learning | Data & Network Security | Advanced Database Systems | Software Project Management

B.Sc. in Software Engineering — Ort Braude College of Engineering 2018 - 2023

Data Structures | Algorithms | Networking | Operating Systems | OOP | Machine Learning | Web Development

EXPERIENCE

Software Engineering Lecturer 2023 - 2025

Atid College, Israel

- Taught 6 courses (Python, Java, C, Assembly, Web Development) over 2 years, instructing 20+ students per class
- Mentored students and supported software development projects

NOC Engineer (Network Operations Center) 2021 - 2022

MoovingOn, Israel

- Monitored network infrastructure across multiple systems, maintaining high availability and minimizing downtime
- Diagnosed connectivity incidents in real-time and coordinated with technical teams for resolution

PROJECTS

RAG System — Document Q&A with AI 2026

- Built production-ready RAG platform with FastAPI and ChromaDB, achieving 95%+ retrieval accuracy; integrated Claude AI with SSE streaming
- Deployed with Docker on Render — github.com/Saher-15/RAG-System

Python, FastAPI, ChromaDB, Claude AI, Docker

AI Travel Planner 2025 - 2026

- Full-stack AI travel app with auth, email verification, OpenAI itinerary generation, and MapTiler maps; deployed on Netlify + Render
- github.com/Saher-15/ai-travel-planner

React, Node.js, Express, MongoDB, OpenAI API, JWT

Email Automation Pipeline 2026

- Automated workflow with 100% email capture rate logging Gmail to Google Sheets; deployed 24/7 on AWS EC2 with Docker and n8n — github.com/Saher-15/email-to-sheets-automation

n8n, Docker, AWS EC2, Gmail IMAP, Google Sheets API

Bank Management System — M.Sc. Project 2025

- Built a full-stack desktop banking application with Java 11 and JavaFX; implemented user authentication, fund transfers, loan/credit/mortgage workflows, and an admin approval panel
- Connected to MySQL via JDBC with MVC architecture — github.com/Saher-15/Bank-Management

Java, JavaFX, MySQL, JDBC, MVC, OOP

More projects on GitHub: github.com/Saher-15

SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Responsive Design

Backend: Node.js, Express.js, FastAPI, Python, Spring Boot, REST APIs, JWT Authentication

AI & Automation: Claude AI (Anthropic), OpenAI API, RAG Systems, ChromaDB, n8n, Prompt Engineering

Cloud & DevOps: AWS EC2, Docker, Docker Compose, Netlify, Render, Linux, SSH, Git

Databases: MongoDB, Mongoose, MySQL, SQL

Programming: JavaScript, Python, Java, C, C# | **Languages:** Arabic (Native), Hebrew (Native), English (Fluent)
