

Saher Saadi

Full-Stack Software Engineer | AI & Automation | React | Node.js | Python | Docker | AWS

+972 50 436 8748 | saher.saadi.99@gmail.com | Israel | saher-portfolio.netlify.app | github.com/Saher-15 | LinkedIn

SUMMARY

Full-Stack Software Engineer with B.Sc. (2023) and M.Sc. (2025) in Software Engineering. Experienced in building production-ready web apps, REST APIs, RAG systems, and automation pipelines using React, Node.js, Python, FastAPI, Docker, and AWS. Skilled in AI integrations with Claude and OpenAI APIs. Trilingual: Arabic, Hebrew, English.

EDUCATION

M.Sc. in Software Engineering — Ort Braude College of Engineering <i>Machine Learning Data & Network Security Advanced Database Systems Software Project Management</i>	2023 - 2025
B.Sc. in Software Engineering — Ort Braude College of Engineering <i>Data Structures Algorithms Networking Operating Systems OOP Machine Learning Web Development</i>	2018 - 2023

EXPERIENCE

Software Engineering Lecturer <i>Atid College, Israel</i> - Taught 6 courses (Python, Java, C, Assembly, Web Development) over 2 years, instructing 20+ students per class - Mentored students and supported software development projects	2023 - 2025
NOC Engineer (Network Operations Center) <i>MoovingOn, Israel</i> - Monitored network infrastructure across multiple systems, maintaining high availability and minimizing downtime - Diagnosed connectivity incidents in real-time and coordinated with technical teams for resolution	2021 - 2022

PROJECTS

RAG System — Document Q&A with AI - Built production-ready RAG platform with FastAPI and ChromaDB, achieving 95%+ retrieval accuracy; integrated Claude AI with SSE streaming - Deployed with Docker on Render — github.com/Saher-15/RAG-System <i>Python, FastAPI, ChromaDB, Claude AI, Docker</i>	2026
AI Travel Planner - Full-stack AI travel app with auth, email verification, OpenAI itinerary generation, and MapTiler maps; deployed on Netlify + Render github.com/Saher-15/ai-travel-planner <i>React, Node.js, Express, MongoDB, OpenAI API, JWT</i>	2025 - 2026
Email Automation Pipeline Automated workflow with 100% email capture rate logging Gmail to Google Sheets; deployed 24/7 on AWS EC2 with Docker and n8n — github.com/Saher-15/email-to-sheets-automation <i>n8n, Docker, AWS EC2, Gmail IMAP, Google Sheets API</i>	2026
Exam Management System — Team Project (6 members) Built JavaFX UI and Java backend with full QA (unit tests); followed full SDLC from requirements to deployment <i>Java, JavaFX, Unit Testing, OOP, Team Collaboration</i>	2022
TCP Multi-Client Chat Server Multi-threaded TCP server in C for 10 concurrent clients using POSIX threads and mutex locks — github.com/Saher-15/tcp-chat-server <i>C, TCP Sockets, POSIX Threads, Mutex, Linux</i>	2026

SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Responsive Design
Backend: Node.js, Express.js, FastAPI, Python, REST APIs, JWT Authentication
AI & Automation: Claude AI (Anthropic), OpenAI API, RAG Systems, ChromaDB, n8n, Prompt Engineering
Cloud & DevOps: AWS EC2, Docker, Docker Compose, Netlify, Render, Linux, SSH, Git
Databases: MongoDB, Mongoose, MySQL, SQL
Programming: JavaScript, Python, Java, C, C# | **Languages:** Arabic (Native), Hebrew (Native), English (Fluent)
